

ABSTRACT OF THE DISCLOSURE

An all terrain vehicle (“ATV”) with a frame and at least three wheels suspended from the frame is disclosed. At least one of the wheels is a front wheel and at least one of the wheels is a rear wheel. The ATV has a power unit for driving at least one of the wheels disposed on the frame and a straddle-type seat disposed on the frame. The seat includes a main seat portion for a driver. The main seat portion has a rearward part. The seat also includes a secondary seat portion, rearward of the main seat portion, for a passenger. The secondary seat portion has a forward part that is laterally narrower than the rearward part of the main seat portion. The ATV also has a steering member for steering at least one of the wheels.
